Sadržaj

1. Uvod

1.1 Korišćeni jezici i okruženje

-HTML/HTML5
 - CSS/CSS3
- JavaScript
- jQuery
-Laravel,PHP, MySql
-AJAX
- PHP Storm za kreiranje projekta-okruženje

1.2 Opis funkcionalnosti

-Na svakoj strani je dinamicki ispisan meni, koji u zavisnosti da li je ulogovan admin ili korisnik, prikazuje razlicite stranice i delove na sajtu(npr. contact samo moze videti ulogovan korisnik, admin panelu samo admin...)

-Ruti /contact se ne moze pristupiti ako korisnik nije ulogovan. Takodje„add to cart" dugme je disabled ako korisnik nije ulogovan. Nakon logovanja dugme gubi disabled funkciju

-Klikom na „add to cart"(svaki klik trigeruje broj proizvoda pored cart ikonice) proizvod odlazi u /cart gde korisnik moze da brise proizvod po proizvod, sve odjednom, ili da zavrsi kupovinu gde se podaci cuvaju u bazi (Koji user, koji proizvod, quantity..) Da se ne bi bespotrebno opterecivala baza, kod je radjen sa Local Storage-om dok ne dodje do klika na dugme „Finish" kada podaci odlaze u bazu)

- Registracija ,logovanje i kontakt(slanje poruke administratoru koji se izlistavaju u Admin Panelu i salju administrator na mejlu - radjeno preko MailTrap-a)-provera radjena preko laravelove validacije (sa requestovima) sa try i catch blokovima pri radu sa bazom. Ukoliko udje u catch prikaze se stranica ,,Error" koja prikazuje error sa quid(unique id)

-U Admin Panelu su zabeleze kljucne aktivnosti kao sto su - pored filtriranja po datumu registrovanih usera (nalazi se u delu gde su i CRUD operacije vezane za usera) postoji i posebna stranica ,,Users Activity" gde se moze, takodje filtrirati po datumu, ali sada filtriranje usera po datumu logina i logout-a. Pored tih aktivnosti, prikazane su i aktivnosti kreiranja ordera na strani ,,Cart Activity"(koji order, koji user, koji poizvodi, quantity i ukupna cena) – mogucnost filtriranja po datumu izvrsenog ordera.

-Za pravljenje tabela u bazi su iskorišćene migracije, a za unos podataka seederi(ne za svaku tabelu, takođe je došlo do raznih promena)

- Takodje, glavni administratorski profil i skoro svaku tabelu za razne operacije(za svaku tabelu za koju je bilo potrebno postavljen je delete, update i insert). Za update i insert proizvoda je postavljen „Choose File" , kao i za update glavnih proizovda na ruti /

-Klik na bilo koji proizvod prikazuje taj prozivod sa dodatnim opisom koji nije vidljiv u galeriji-shop-u

-Klijentska pretraga (filter odradjen u Admin Panelu) spojena sa paginacijom koja prikazuje cetiri proizvoda po strani

-Odredjenim stranicama i odredjenim korisnicima je zabranjen pristup preko url adrese odradjeno preko middelware-a (odradjena redirekcija na home stranu(ruta /))

-Dokumentacija i Autor se nalaze u footert(kao Author je postavljen link ka portfolio sajtu radjen na Praktikumu iz Web Dizajna)

1.3 Template
-Za izradu ovog sajta je korišćen gotov css template
https://www.free-css.com/free-css-templates/page235/treviso uz modifikacije, kako bi sajt sto vise odgovarao mojim potrebama i potrebi teme koja je izabrana

-Deo za admin panel je takodje template

4. Organizacija sajta

## Slike stranica i kratki opisi funkcionalnosti

4.1.1 Meni

-Meni(dinamicki ispisan iz baze), koji se razlikuje u zavisnosti da li korisnik uopste nije ulogovan(prikaz gore), nakon logovanja(admin ili obican korinsik) prikaz se menja

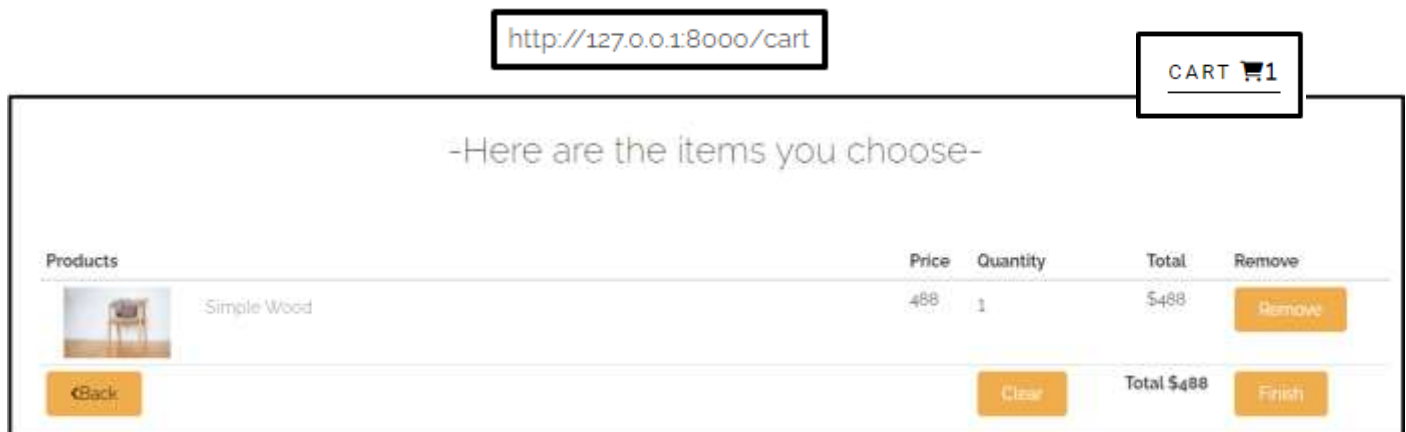

4.1.2 Pretraga + paginacija

-Pretraga proizvoda urađena preko ajaxa, gde pri klikom na dugme ,,search" izlistavaju prozivodi spojeni sa paginacijom(8 proizvoda – 2 strane)
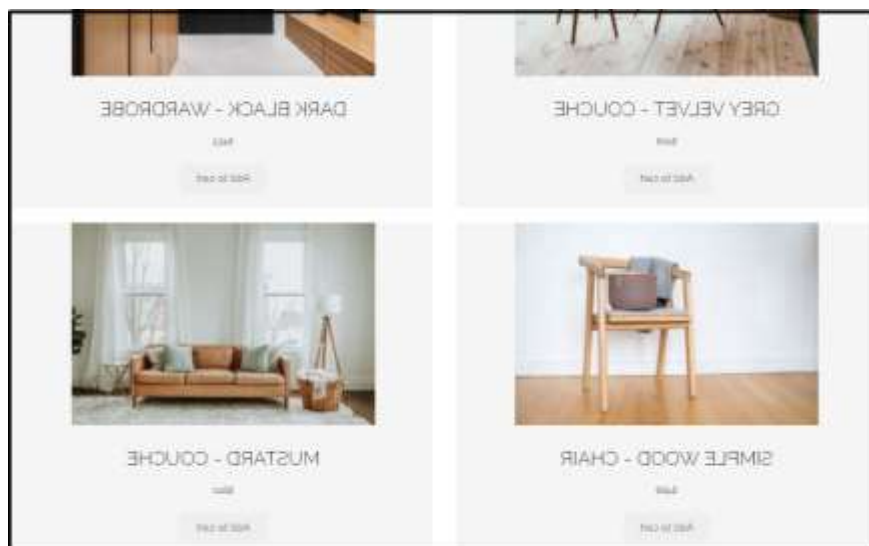

4.1.3 Prikaz proizvoda

-Izlistani proizvodi koji ispod imaju paginaciju u kojoj se prikazuje po cetiri proizvoda (stanje se menja pri uploadu dodatnih proizvoda). Kada korisnik nije ulogovan dugme ,,Add to cart" je disabled dok se neko ne uloguje(pored toga, nema pristup cart strain)
 Nakon logovanja pristup odobren i korpa funkcionalna

CART 🛒1

-Here are the items you choose-

Products		Price	Quantity	Total	Remove
	Simple Wood	488	1	$488	Remove
‹Back				Total $488	Finish
				Clear	

4.1.4 Prikaz izabranih proizvoda u korpi

Za svaki proizvod su izlistane date informacije
-Button ,,Remove" uklanja samo taj proizvod u kom se redu kliknulo
-Button ,,Back" vraca korisnika na shop stranu, drugi button ,,Clear " uklanja sve odabraneproizvode iz korpe nakon cega se prikazuje poruka da je korpa prazna
-Treci button ,,Finish" pri kliku prikazuje alert i cuva podatke u bazu(koji korisnik, koji prozivod..)
